Superior Street Products By Design

At Hawk Performance we understand that brake pads are critical components that directly affect vehicle handling, safety and driver confidence. That's why our products are engineered to meet and exceed the braking demands of today's severe-duty & high

performance vehicle applications. Each Hawk Performance brand product incorporates advanced engineering design, world-class friction technology and premium-quality raw materials.

POWDER COAT & ZINC DICHROMATE PLATING

- Hawk's dual layer outer shell offers superior corrosion resistance and smooth brake engagement.
- Each backing plate is first coated with zinc dichromate. The finished part is later sealed with an Aerospace-grade, high-temperature, electrostatic powder coat.

FRICTION MATERIAL

- Hawk Performance's world-class friction formulations deliver superior stopping power and durability for any high-performance or severe-duty application.

SURFACE PREPARATION

- Diamond ground for exceptional surface conditioning and flatness.

SLOTTED FRICTION

- Adds friction flexibility to relieve stress.
- Aids in the removal of friction debris.

MECHANICAL RETENTION SYSTEM

- Hawk's mechanical bond/retention system features hundreds of small extruded hooks that are molded directly into the friction material. In terms of bond and shear strength, there is no better product.

BACKING LAYER

- Hawk incorporates a special backing material at the bond line that creates a micro heat shield and optimizes bond strength.

STEEL BACKING PLATE

- Engineered to meet Original Equipment design for fitment.
- Hawk's mono-block backing plate design increases flexural strength, and provides superior braking engagement.

HOT BOND SHIM

- Hawk's advance engineered shims feature a single layer of steel with a high-temperature rubber coating. Each shim is designed to dampen noise and hot bonded to eliminate delamination.

PAD CHAMFER

- Engineered to eliminate noise and vibration.
- Improves brake engagement quality.

Hawk—The Solution for Better Braking Performance

Whether you drive in spirited fashion through canyon switchbacks or pull 20,000 lbs over 4,000-foot summits, Hawk Performance has engineered the right pad friction compound for your street performance goals.

Selecting the right product for your specific car or truck is critical. The graphs to the right illustrate the performance ratings of our street products. Each graph represents a vehicle group and the product rating for the following key characteristics.

- Stopping Power
- Rotor & Pad Wear
- Noise
- Dust

The Hawk Advantage:

- 20-40% more stopping power than stock pads
- Quick warm-up
- Strong, balanced initial bite
- Superior fade resistance
- Low dust properties
- Rotor friendly—will not shorten rotor life
- Outlast stock brake pads
- Lifetime warranty

Reference pages 6 to 9 for complete street product line descriptions. For make, model and year applications guide turn to page 24. If you have purchased a conversion brake kit or non-OE caliper, use our “specialty caliper guide” on page 178.

Do You Race? Hawk Performance has over ten application-specific race pad compounds for practically any form of Motorsports. Please refer to page 14 for an introduction to our comprehensive line of Motorsports products & applications.

Hawk Performance Product Rating Guide* (Street Brake Pads)

Performance Rating: 1=Poor 10=Excellent (for each category listed above)

*Performance ratings are provided as a general recommendation. Actual performance ratings of any given product will vary as vehicle applications change.

HPS-High Performance Street

When it comes to performance braking for street vehicles, there is no equal.

Superior Stopping Power For The Street

HPS - (High Performance Street) disc brake pads are world-renowned for increasing stopping power on your street legal vehicle. Hawk Performance's engineers developed the HPS compound by blending the safety and quality aspects of Aerospace design with braking technology derived from Motorsports efforts. The result is a unique Ferro-Carbon brake compound that delivers significant advantages of increased stopping power, extended pad life, extended rotor life and low dust properties for street applications.

Our high performance street compound offers a higher coefficient of friction over stock brake pads and can provide you 20-40% more stopping power, with higher resistance to brake fade than standard replacement pads.

HPS Brake Pad Key Features:

- Increased stopping power
- High friction/torque hot or cold
- Gentle on rotors
- Extended pad life
- Low dust
- Virtually noise-free
- Ideal for import & domestic automobiles

All Hawk Performance street brake pads provide a limited lifetime warranty, ensuring products to be free of defects from manufacturer's workmanship and materials. Please see page 11 for complete warranty information.

Important Installation Instructions

All brake pads require a burnishing or bedding-in procedure in order to achieve optimal performance and durability. During the bedding-in process the pad conforms to the rotor surface and generates an import transfer film. Prior to installation, make sure the brake system is free and clear of debris, brake fluid is replaced and all brake components are properly installed and in good working order. See the FAQ section on page 10 for more information on proper brake pad bedding procedure.

PERFORMANCE CERAMIC-Luxury & Touring

Quiet, clean and quick stopping Performance Ceramic is better than standard replacement ceramic brake pads.

Quiet, Clean Performance

Hawk understands the demands of today's ceramic brake pad users, and specifically formulated our ceramic composite material to meet the ultra-low dust, low noise performance of OE ceramic pads. The advantage of our performance ceramic compound is that we don't sacrifice stopping power in order to achieve the traditional ceramic pad attributes. Additionally, our ceramic product provides a linear friction profile which allows your ABS system to operate more effectively.

Performance Ceramic Brake Pad Key Features:

- Extremely quiet—engineered to reduce brake NVH (Noise, Vibration and Harshness)
- Increased stopping power
- Increased rotor life
- Extended pad life
- Ultra-low dust
- Stable friction output
- Ideal for import and domestic sportscars and luxury cars, sport trucks, vans and SUV's with light towing and hauling duty

Important Installation Instructions

All brake pads require a burnishing or bedding-in procedure in order to achieve optimal performance and durability. During the bedding-in process the pad conforms to the rotor surface and generates an import transfer film. Prior to installation, make sure the brake system is free and clear of debris, brake fluid is replaced and all brake components are properly installed and in good working order. See the FAQ section on page 10 for more information on proper brake pad bedding procedure.

Results based on A04D Dyno tests using D52 automotive platform. Actual on-vehicle performance may vary.

Recommended for import & domestic automobiles, luxury SUV's, sport trucks & vans.

Results based on A04D Dyno tests using D655 1 ton truck platform.
Actual on-vehicle performance may vary.

Ideal for import and domestic full-size trucks, SUV's and vans with moderate towing and hauling duty.

LTS-Light Truck & SUV

Stop putting car brakes on your truck. Hawk's LTS compound is specifically formulated for large brake systems found on full-size trucks and SUV's.

Engineered By Truck Brake Pad Experts

At Hawk Performance, we understand that traditional car brake pad technology just doesn't cut it on today's trucks. This is especially true if you haul heavy payloads or trailers. Install our LTS brake compound and dramatically improve your truck's stopping power and fade resistance. Additionally, Hawk Performance LTS compound will out last the competition in terms of rotor and pad wear.

What Makes Us The Truck Experts?

For over forty years, we have developed and supplied friction solutions for some of the largest trucks on the planet. Our products are utilized by both OE and aftermarket companies servicing the mining, construction, Military and commercial truck markets. We have utilized this technology and combined it with Aerospace design quality to develop the ultimate on-highway truck and SUV specific friction material.

LTS Brake Pad Key Features:

- Designed for large brake systems found on full-size trucks
- Engineered using technology from fleet & Military applications
- Ferro-Carbon friction material delivers more braking power and fade resistance than OE pads
- Low dust
- Excellent pad and rotor life
- Virtually noise-free
- Ideal for import and domestic full-size trucks, vans and SUV's (1/2 ton) with moderate towing and hauling duty

All Hawk Performance street brake pads provide a limited lifetime warranty, ensuring products to be free of defects from manufacturer's workmanship and materials. Please see page 11 for complete warranty information.

Important Installation Instructions

All brake pads require a burnishing or bedding-in procedure in order to achieve optimal performance and durability. During the bedding-in process the pad conforms to the rotor surface and generates an import transfer film. Prior to installation, make sure the brake system is free and clear of debris, brake fluid is replaced and all brake components are properly installed and in good working order. See the FAQ section on page 10 for more information on proper brake pad bedding procedure.

SUPERDUTY - Severe-Duty Truck

For serious towing/hauling and commercial truck fleets.

Unequaled For Severe Duty Use

Hawk Performance SuperDuty brake pads utilize our OE and aftermarket severe-duty friction technology. This product has been engineered for class 2 and higher on-highway commercial trucks. This unique Ferro-Carbon material delivers extremely high fade resistance, with superior high temperature rotor and brake pad wear. **This product is not recommended for personal or recreational trucks and SUV's.**

SuperDuty Brake Pad Key Features:

- Engineered from technology used in heavy-duty on/off-highway and military applications
- Extremely high coefficient of friction and fade resistance
- Recommended for professional fleets (greater than 1 ton) and light trucks towing excessive payloads

Important Installation Instructions

See page 10 for proper brake pad bedding procedures.

HP PLUS - Autocross & Racing

For import and domestic streetcars that compete in Autocross, Solo and Track Day competition.

The Ultimate Double Duty Friction Compound

Hawk's HP Plus race compound can take the heat of the track, and get you home safely without having to change back to street brake pads. HP Plus was developed and manufactured for sport driving in Track Day applications. This friction formulation offers lower wear rates and higher torque values than other competitive materials.

HP Plus Brake Pad Key Features:

- Extremely high friction output
- Extremely high fade resistance

WARNING! Due to the dramatic friction levels produced by this product to achieve "race-level" braking, rotor wear, noise, dust, and pad life may be affected. All Hawk Performance HP Plus / Autocross brake pads provide a limited lifetime warranty, ensuring products to be free of defects from manufacturer's workmanship and materials. Please see page 11 for complete warranty information.

Important Installation Instructions

See page 23 for proper HP Plus brake pad bedding procedures.

Motorsports Pad Introduction begins on page 14!

Racing Partnerships

Hawk Performance is dedicated to manufacturing the absolute best Motorsports brake pads in the World. To ensure this, we go beyond our laboratory and in-house dynamometer testing and work directly with championship race teams, professional racing organizations and advanced

driving schools to test and improve our products. This immediate, unfiltered feedback from trusted industry experts helps drive the creation of next generation products that will meet the needs of a constantly evolving Motorsports market.

SCCA

Hawk Performance is the Official Brake Product of the Sports Car Club of America (SCCA). The SCCA is the largest race sanctioning body in the United States, with over 55,000 members who compete in over 2,000 events in Road Racing, Autocross and Rallying.

NASA

Hawk Performance is the Official Brake Product of the National Auto Sport Association (NASA). NASA is the fastest growing sanctioning body for amateur Motorsports in the country and offers many innovative programs that allow drivers of all experience levels to enjoy distinct disciplines such as High Performance Driving Events (HPDE), Rally, Time Trial, NASA-X and Competition Racing at over 500 events per year nationwide at premier venues.

USAR Hooters Pro Cup Series

Hawk Performance is a proud contingency sponsor for the USAR Hooters Pro Cup Series. This series has become one of the most talked about racing programs in the nation and has experienced phenomenal growth in just 10 years, growing from 11 races during its first season to a 21-race, two division schedule.

GRAND AM

Grand-Am Road Racing, which operates and sanctions the Rolex Sports Car Series and the KONI Challenge Series, is the premier Road Racing organization in North America. The 13-race Rolex Series 2009 schedule and the 12-race KONI Challenge Series 2009 calendar delivers professional sports car racing to key markets throughout North America in addition to being televised in the United States and Canada on SPEED channel and distributed globally through ESPN International. With title sponsorship support from Rolex Watch USA and presenting sponsorship from Crown Royal Cask No. 16, the Rolex Series showcases emerging and legendary drivers from around the globe and thoroughbred racing machines from the industry's leading constructors and the World's top automobile manufacturers. Learn more about Grand-Am at www.grand-am.com.

PROUD CONTINGENCY PARTNER OF

CHAMPION RACING ASSOCIATION (CRA)

Hawk Performance is the Official Brake Pad and a proud Contingency Sponsor of the CRA Super Series for Super Late Model stock cars. In 2008, the Super Series ran 18 races at 13 different racetracks in Indiana, Michigan, Ohio, Tennessee and Georgia with over 200 different drivers and over 120,000 people in attendance. CRA-sanctioned races are held on tracks less than ½ mile in length and are typically 125 laps long, with some special events running up to 400 laps.

INTERNATIONAL MOTOR CONTEST ASSOCIATION (IMCA)

The International Motor Contest Association (IMCA), organized in 1915, is the oldest active automobile racing sanctioning body in the United States. This highly successful series focuses on affordable professional racing with strict adherence to regulations, with divisions for Modifieds, Late Models, Stock Cars and Sprint Cars. Hawk Performance is a proud contingency sponsor of the IMCA.

LUCAS OIL DIRT SERIES

The Lucas Oil Late Model Dirt Series was founded in 2005. Racers compete in 2,300 lbs. Dirt Late Model cars, powered by 800 horsepower engines that turn in excess of 9,000 RPM. The Lucas Oil Dirt Series sanctioned 44 events in 16 states with a Series record \$2.9 million dollars paid out in event purses, championship point fund and bonus money in 2008. Hawk Performance is a proud contingency sponsor of the Lucas Oil Dirt Series.

Motorsports Compound Codes

Below are descriptions of the available compounds for Hawk Performance Motorsports brake pad compounds:

DTC-70

Extremely high torque with aggressive controllable initial bite. Superior release and torque control characteristics. Brake pads designed for cars with high deceleration rates, with or without down force, on non-ABS-sensitive applications.

DTC-60

High torque with less initial bite than DTC-70. Superior release and torque control characteristics. Brake pads designed for cars with high deceleration rates, with or without down force. Recommended for use with DTC-70 when split friction between front and rear axle is desired on non-ABS-equipped applications. Popular choice for use on lighter weight front axle applications, with or without ABS.

DTC-30

Brake pads designed to meet the demands of Open Wheel and Dirt Circle Track racing. Uniquely controllable torque with smooth consistent feel and bite. Superior release and torque control characteristics.

DTC-05

Developed specifically to meet the demands of Dirt Track racing on high momentum race tracks where high torque is not necessary. Excellent pad for hard spec-tire racing. This friction formulation provides very controllable, higher-temperature performance compared to stock pads.

HT-10

Intermediate to high torque with a smooth initial bite. Very consistent pedal feel. Excellent modulation and release characteristics.

Blue 9012

Medium to high torque and temperature compound, with excellent brake modulation.

MT-4

Medium to high torque and temperature compound, with medium to high initial bite. Brake pads designed for Circle Track cars under 2800 lbs, without high deceleration rates.

Black

Medium torque and temperature compound designed to be a good, all-purpose, low-cost racing brake pad.

DR-97

Good static coefficient of friction on cast iron rotors. Smooth linear torque. Low pad and rotor wear. Brake pads specifically designed for use in drag racing applications.
