Brake Pad Technology

GO FAST....STOP FASTER

Wellman Products Group is a worldwide leader in the engineering, development and production of brake & clutch materials for automobiles, trucks, aircraft and heavy equipment in both the Aftermarket and Original Equipment supply chain. Marketed under the Hawk Performance, VelveTouch and Wellman brands, our products are utilized worldwide in the aerospace, military, motorsports, performance street, construction and commercial fleet market segments.

Since 1924, our business objectives have remained unchanged; to provide severe-duty and high performance friction solutions to our customers through cutting edge material technology development, state-of-the-art manufacturing and world-class quality systems.

What separates Hawk Performance from all the rest?

AEROSPACE: While others claim aerospace technology, we drive it. As the leading global OE supplier to this industry, we set the trends for advanced friction technology.

MILITARY: As a primary supplier for military tanks, heavy equipment and HMMWVs (Hummer), our friction materials perform flawlessly in nearly every form of brutal terrain around the globe.

MOTORSPORTS: Our products are utilized by more champions than any other friction manufacturer. In the heat of battle, Hawk Performance provides race car drivers a substantial competitive edge.

AUTOMOTIVE: Recognized as the leader in the performance street market, our products provide improved braking over original equipment and leading aftermarket competitors.

Hawk Performance, the first and best choice to increase your vehicle's performance.

HPS Performance Street Compound

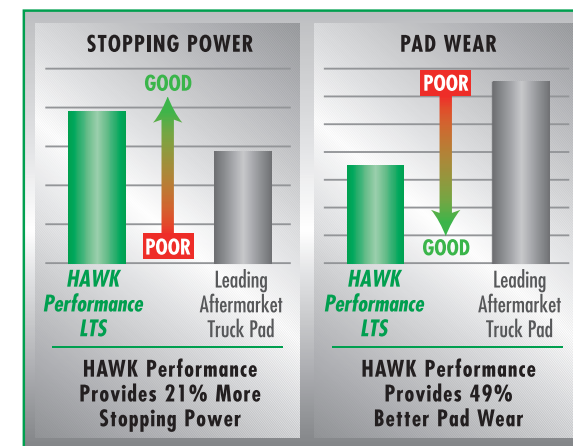

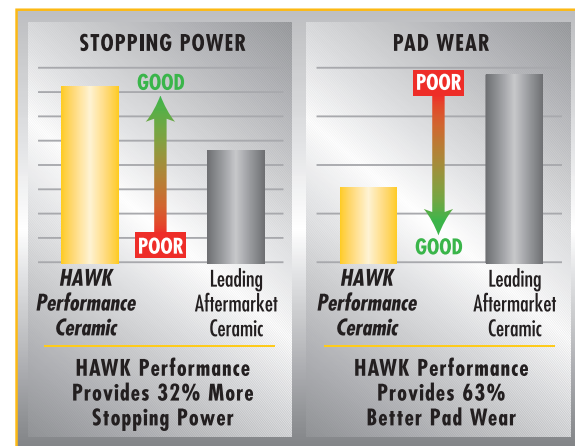

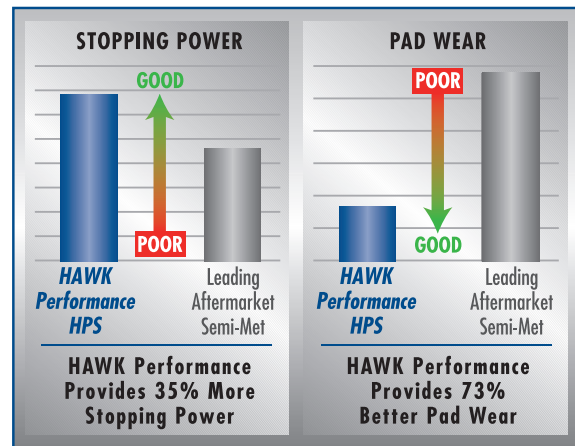

PERFORMANCE CERAMIC Luxury & Touring Compound

LTS Light Truck & SUV Compound

SUPERDUTY Severe-Duty Truck Compound

HP PLUS Autocross

When it comes to performance braking, there is no competition. This unique Ferro-Carbon compound combines the safety and quality of Aerospace design partnered with the braking technology of motorsports. Much improved braking over OE and standard replacement brake pads.

Recommended for import & domestic automobiles.

Results based on A04D Dyno tests using D52 automotive platform. Actual on-vehicle performance will vary.

Specially formulated ceramic composite developed to meet the ultra-low dust, low noise performance of OE ceramic brake pads. Performance Ceramic pads also feature a fade resistant, linear friction profile that produces improved braking over OE with smooth engagement characteristics. Performance Ceramic – quiet, clean & fast stopping.

Recommended for import & domestic automobiles, luxury SUVs, sport trucks & vans.

Results based on A04D Dyno tests using D52 automotive platform. Actual on-vehicle performance will vary.

LTS Ferro-Carbon material is specifically designed for the larger brake systems used in full-sized light trucks. LTS offers improved braking over OE, superior fade resistance and excellent pad and rotor life.

Recommended for import & domestic full-sized SUVs, vans & light trucks.

Results based on A04D Dyno tests using D655 1-ton truck platform. Actual on-vehicle performance will vary.

Recommended for Autocross, Solo II and track day event applications.

Dynamic Torque Control (DTC)

Hawk Performance has dominated Motorsports braking for over 15 years, offering highly engineered friction products for nearly every type of racing.

The key to our success has been and continues to be, our passion to develop leading edge product technologies and maintain our position as the global market leader. Our premier DTC product line is a direct result of our passion and commitment to Motorsports. When it comes to superior braking performance our DTC product line has no equal.

2007 DTC Product Line

DTC-70

- Very controllable high torque with smooth initial bite.
- Excellent release and modulation characteristics.
- Unbeatable pad and rotor wear.

DTC-60

- Less torque and initial bite as compared to DTC-70.
- Provides outstanding lighter weight vehicle performance.
- Perfect for drivers who prefer split friction levels between front and rear axle.
- Excellent release and modulation characteristics.

DTC-30

- Developed specifically to meet the demands of Dirt Track Racing.
- Provides unique control of brake torque allowing later and deeper brake use into the corners, while requiring less pedal effort and shorter pedal engagement times.

DTC-05

- Developed specifically to meet the demands of lower torque Dirt Track Racing.
- Developed for drivers who prefer lower brake torque. This friction formulation provides very controllable, higher temperature performance as compared to stock pads.
